

# Full Stack Developer (m/f/x)

Temedica

## About us

*We are a Digital Health Startup in the heart of Munich that has made it its mission to improve the quality of life of its users. With our digital products, we accompany patients on their individual health path and help them to achieve the best possible therapy result.*

*Join us on our mission and become part of Temedica:*

- We are a super nice, relaxed, motivated and international team*
- We believe in you - you get maximum responsibility and trust from day one*
- We practice a fair feedback culture so that everyone can fully exploit their potential*
- We are working goal driven and live our shared values*
- We organize regular team events, provide you with delicious coffee, snacks and smoothies and have a really cozy office*

### Contact:

Hannah Altenburg (Recruiting)  
Diego Gomez (Head of Software)

**E-Mail:** jobs@temedica.com

**Start date:** as soon as possible

**Workplace:** Munich

## Your tasks

**We think fast and act fast to drive our products in the right direction. Your challenge is not just to implement frontend and backend solutions, but also to make decisions move quickly and build scalable software.**

**Live creativity:** You develop single page applications and components with Vue.js and native shells for our hybrid apps with React Native.

**Take responsibility:** You build web apps, APIs and libraries with Ruby/Rails.

**Shape the future:** You work closely with our CTO and Head of Software to design a stable and flexible software platform that will be our company's core technology for years to come.

**Implement in cooperation:** You help your fellow developers with feedback and code reviews.

**Learn new things:** You take part in improving our internal and external infrastructure and task automation.

## Your Profile

**Personality:** You have a deep desire to immerse yourself in a product and make it come alive.

**Workstyle:** You are a team player but can also work self-reliant and with minimal guidance.

**Training:** You have several years of experience in building real-world web and/or mobile apps and the portfolio (GitHub, Bitbucket or similar) to prove it.

**Knowledge:** You have built at least a couple of apps/tools with Ruby (preferably Rails) and/or JavaScript (preferably Vue.js or React)

**Language:** You're fluent in English. Knowledge of German is a plus.
