

## Business Intelligence Working Student (f/m)

You're a tech student and passionate about data analytics and data interpretation?  
 You want to gain valuable real-world experience and leave a mark in the healthcare?  
 You'll fit right in with us at Temedica!

At Temedica we develop medical apps for the therapy support of patients and promote the health state of our users. With the help of our innovative digital technologies, we improve medical care and bring the patient back into focus.

### Your tasks:

As a Business Intelligence Working Student, you'll be part of our product team. When you start, we will support you to familiarize yourself with our data structures and create queries, reports and dashboards under the guidance of experienced colleagues.

With increasing knowledge and experience, you will become more and more independent and contribute to the further development of business intelligence tools and analysis possibilities.

This particularly means:

- You derive information from collected data in a way that data-based business decisions can be made
- You support us in the development and analyses of different product tests
- You create meaningful reports and analyses and support stakeholders (marketing, product, etc.) in their decisions

*\* The next beer garden and the famous Oktoberfest is right around the corner*

### Here's what we offer:

- We are a good-humored international team, located across Europe with our headquarters in Munich\* (Germany)
- We offer you many learning opportunities through diverse tasks and experts with different specializations at your side
- We trust you from day 1 and your input matters greatly to us every single day
- We host regular team events and provide free drinks, coffee and fruits

### What you should bring:

- You are studying computer science or any other technically oriented course of studies
- You have advanced experience with Excel. SQL and/or programming languages (Ruby, Python) would be a huge plus
- You enjoy diving into a variety of data, filtering relevant information and questioning it
- You are interested in visualizing data and making it available to colleagues in this way

### Job details

- Starting date: ASAP
- Type: Working student
- Location: Munich
- Languages: English, German (huge plus)
